

**Position:** Intern / Coop - 2027

**Focus Areas:** Site / Civil Engineering, Sustainable Design, Landscape Architecture,  
or Land Surveying

**Location:** Carmel, IN / Northside Indianapolis

You're reading this because you want an internship or coop experience that will prepare you for the rest of your academic pursuits and early career, not just a job to put on your resume. Well, you've found it. Here's a small sampling of what other students discovered during their time with us:

*"Site visits really helped me visualize what I was seeing on the plans." – Mallory*

*"I was very involved in my team's projects for clients. Not just drafting lines or doing busy-work, but given things needed to be done and working on real project elements. I liked how I was able to advance my responsibilities as I proved myself rather than being limited to the level of others."*  
- Amanda

*"It's an internship you won't want to pass up. My mentor was a great leader and resource for me."*  
- Spencer

*"I didn't expect to get this much training and work experience. It was a very team-oriented environment, and I was involved in the entire project. It was mind-blowing how much feedback I was given and how much progress I made over the summer." – Brady*

*"It was great getting involved throughout the design process." – Allysa*

*"There's a lot to learn and opportunities to be creative." – Blake*

*"What really stood out was how everyone was so welcoming and kind. They answered all my questions which accelerated by learning. You can go anywhere for an internship, but it really does come down to the who you're working with." – Amanda*

*"A great group of people and amazing culture. Instead of being stuck in a cube all day, you can collaborate effectively and socialize in fun ways. They were interested in my success from day one." – Jake*

*"After talking with my friends about their internship experience at other companies, I'm learning a lot more and getting more opportunity to be involved on real client projects." - Katie*

Weihe Engineers specializes in land development and provides expertise in site / civil engineering, sustainable design, landscape architecture, and land surveying for some of the biggest developers, owners, builders, and brands across the U.S. who by choosing to work with us—choose to build with confidence.
