

**Position:** Civil / Site Development Intern  
**Location:** Indianapolis, IN or St. Louis, MO  
**Start Date:** May 2024

### Job description

As an aspiring civil engineer, you likely have a passion for the built environment. A career in civil / site development will provide you a front-row seat to commercial, residential, and industrial land development projects across the nation. Your internship experience at Weihe Engineers is a great way to get started.

How do you know if civil / site is the right fit for you? Professionals in civil / site like the fact they remain a well-rounded engineer as projects involve aspects of geotechnical, water resources, environmental, transportation, and construction engineering. And, that no two projects are alike. As a result, you will be well positioned to pass the Principles and Practice of Engineering Exam (PE) to become licensed.

In our 63<sup>rd</sup> year, Weihe Engineers is a great place to augment your academics with real world experience. We have experienced, licensed professionals to help mentor you as well as guide your professional development. Better yet, you'll find a life/work balance (average 40-45 hours per week) that you'll appreciate. Plus, you're paid overtime for when you do exceed 40 hours per week. These are just a few of the reasons we've been named Top Workplaces (2019 – 2023).

As an Intern, you'll be working on a dedicated team and working closely with a Project Manager, an Engineer/Designer and a CAD Technician on real, active projects. Together, you'll serve long-term, loyal, national-brand clients helping to drive projects to completion. Your initial role will be to provide CAD drafting skills, assist in plan-graphics review, conduct quality control assessments, and to learn skills in site calculations and design (grading, drainage, sanitary).

### Preferences

- Experience with AutoCAD
- Experience with AutoDesk Civil 3D is a plus (if not, we'll train you)
- Experience in site development projects is a plus
- Excellent accuracy and attention to detail
- Great work ethic
- Ability to multi-task efficiently
- Quick learner
- Very comfortable and excels in a fast-paced environment
- Customer-service minded
- Positive, proactive attitude

Whether you want to learn more, have questions, or are ready to schedule an interview, please contact Bernie Pesut, Director of Human Resources, at 800-452-6408 or [berniep@weihe.net](mailto:berniep@weihe.net).
